

# Profile Sports M3 (Ball Stop Mesh) Series

## Description

Making sure that balls stay within the areas of play is essential in many sports, and our strong and durable Ball Stop Netting systems will both prevent them escaping and ensure there are no stoppages. Available in heights from 500 to 10000mm, and in a range of mesh densities, this cost-effective netting easily integrates with any fencing system, particularly with our M1 and M2 systems.

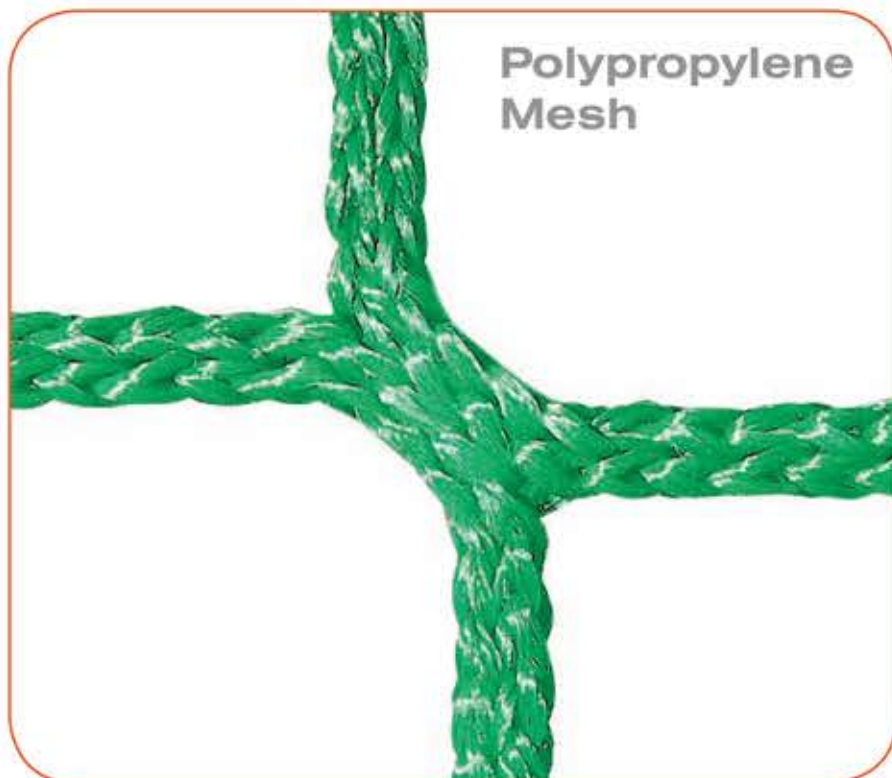

The thick weather resistant mesh is hard-wearing and fits to posts easily, with a strong line wire for added support.

Ball Stop Netting systems are ideal for preventing lost equipment in schools and for enhancing the appeal of MUGAs (multi-purpose game areas), and it comes in extremely useful in a variety of amateur and professional sports where ball containment is vital.

It is available in a range of colours so you can match it with your existing sports fencing system.

## Suitable Applications

Schools, Local Parks, Colleges, Sports & Fitness Centres as a higher intensity sports containment area.

Polypropylene Mesh

## Gates

A complete range of Swing Gates are available to suit all requirements.

## Posts & Fixings

Posts are generally specified to suit all application requirements or subject to calculations for wind and personnel loading. Manufactured deom pre-galvanised Rolled Hollow Section and a PPC coating. Metal Fixing clips come with Vandal resistant security fixing.
