

Railings – Bowtop, Vertical, Estate & Pedestrian Series

ROSPA, Bowtop Railing

Child Safe design specifically to comply with ROSPA safety guidelines and BS EN1176 requirements.

Child Safe railings are available from 900mm to 1800mm high supplied with posts. The panels are attached to the posts using an adjustable post lock arrangement.

Available in multi-colour designs to add a sparkle into any play area.

Standard Bowtop Railing

Bowtop fencing is perfect for many applications. Perfect for all kinds of permanent protection - for gardens, cliff tops, parks and open spaces etc. Heights and specification are manufactured to your requirements, following strict BS guidelines for safety and load bearing.

Vertical Railing

Traditional and long lasting. When a solid boundary fence is required choose Vertical Bar Railing. Comes in heights from 1.2m to 2m available with blunt, spiked and domed tops.

Pedestrian Guard Rails – Solid, Staggered & Letterbox

Our range of specialised pedestrian guard rails are ideal for roadsides where heavy traffic flows. Guard rails provide extra protection for pedestrians.

Genwork also offer a range of high visibility guard railing which has staggered vertical bars.

The staggered vertical bars allow more visibility to pedestrians through the barrier as well as enhanced visibility for drivers to see pedestrians.

Estate Railing

Traditional railing as used extensively in the countryside. Can be supplied in traditional component form or in Genwork 2 metre wide hurdles, which are simply bolted together.

Gates

A complete range of Swing Gates are available to suit all requirements.
