

Genwork Weld Mesh Stainless Steel

The benefits of stainless steel products have long well been known. Giving greater life and higher quality, these benefits are becoming increasingly more attractive as customer requirements change to meet higher performance specifications.

Our range of stainless steel mesh reflects the needs of this expanding market and offers a high performance alternative to other steel finishes.

It is suitable for a multitude of applications throughout industry, Building and Construction, catering, medicine, animal protection and caging as well as a wide variety of high-tech usage.

Genwork welded mesh is manufactured from bright drawn mild steel wire to BS1052. Electronically welded at every intersection, it is produced in self-colour (lightly copper coated) and galvanised after manufacture to BS 443. Some specifications are produced from pre-galvanised wire and stainless steel types 304 and 316.

As a leading distributor of Welded Wire Mesh, we can supply the widest range of premium quality material - from stock.

Coatings - Self Colour, Galvanised, Bright Zinc plate and Powder Coated.
